

Sanju Shah- Full Stack Developer

Developer with a background in Computer Science. Hands-on experience in web development (React, JavaScript, Laravel Jetstream, PHP, Node.js, and MongoDB.) as well as mobile development (Java, Kotlin.)

EXPERIENCE

PalmaVerde (April 2024 - Current, Germany)

Working as a full stack developer to build a platform to connect farmers and customers to sell/buy products. I built authentication, product listing and dashboard.

Freelancing (Feb 2024 - Current, Germany)

After finishing bootcamp, I have been involved in various freelancing projects as a full stack developer. Some of them include:

- Job Portal: Developed a RESTful API allowing authenticated users to create, edit, update, and delete job posts.
- Riddle Game: Developed a monolithic application to manage riddle questions and answers.

Bootcamp (Mar 2023 - Feb 2024, Germany)

Participated in a full stack bootcamp to enhance my all-round knowledge in various technologies and gain practical experience. Some of the major projects I built and participated during this period includes:

- MovieBox Frontend App: A React based web application designed to display movie details, allowing users to favorite specific movies and effectively manage their user accounts. Deployed on Vercel.
- MovieBox Backend API: A RESTful API built with Express, Node.js and MongoDB which allows authenticated users to access detailed movie information. Deployed on Render.

Freelancing (Feb 2022 - Mar 2023, Germany)

Freelanced as an Android developer, building various apps for different clients. Some of the major projects include:

- Chat Application: An application where you can chat with OpenAI.
- Note Application: Android application to take notes securely and store it in the cloud. Integrates with a backend API and includes features such as login, registration, crud for notes etc.

Nepal Television (July 2016 - Dec 2021, Nepal)

Worked as a Technical Assistant in the Engineering Department. My responsibilities included supporting live program production, collaborating with team members to support 24 hours scheduling of television programs & handling real time streaming.

EDUCATION

Bachelor in Computer Science, IGNOU (2016 - 2020, Nepal)

Graduated with distinction marks. Learned about various programming languages, data structure and algorithms and project management methodologies.
